Desktop Commander

Build, explore, and automate on your local machine

v0.2.24 December 2024

✨ NEW FEATURES

PDF Support

Read, create, and modify PDF files directly.

- Extract text as markdown
- Create PDFs with HTML/CSS styling
- Merge and split documents

Excel Support

Complete Excel file handling.

- Read .xlsx, .xls, .xlsm files
- Sheet selection & range queries
- Edit specific cell ranges

Terminal Pagination

Prevent context overflow.

- Offset-based reading
- Configurable line limits
- Better process handling

Privacy Update

More transparent data practices.

- Clear collection disclosure
- 14-month auto-deletion
- Dedicated privacy contact

🐛 BUG FIXES

MCP Protocol Violation

Fixed stdout writes before client initialization that broke handshake with langchain-mcp-adapters.

Windows Compatibility

Fixed ripgrep detection and cross-platform postinstall script issues.
